## UNLOCK EFFICIENCY AND EXCELLENCE

### CHALLENGES OF MANUAL QUALITY CONTROL: AUTOMATE WITH ACCELARMED QN:

- Human errors prone to splashes, carryovers, and mis-plating
- Inefficient and time-consuming processes
- Compliance risk and reputational damage from incorrect results
- Automated AI-driven detection of splashes, carryovers, and mis-plating
- End-to-end workflow automation of QC activities
- Seamless integration with LIMS and PCR systems
- Audit trails for compliance and record-keeping

- **AccelarMed QN** web portal with smart, visual insights on splashes, carryovers, and mis-plating
- Order reprocessing and acknowledge quality-checked results to your LIMS with just few clicks
- Maintain comprehensive audit trails of QC activities for smooth audits

- **30% cost reduction** in quality control activities of certifying scientists
- Reduced overall cost and faster turnaround times of lab test
- Improved brand protection
- Streamlined QC processes for effortless compliance
